Computer Engineering (AI Minor) at University of Toronto

85 Wood St
Toronto, ON, Canada

January 16, 2024

66 Wellington Street West, Td Tower, Toronto

Dear Recruiter at TD:

About Me

I am a computer engineering student pursuing a minor in artificial intelligence at the University of Toronto (UofT) graduating in May 2024. I am a person who likes to build and learn from the experience. My courses have helped me challenge my assumptions to explore other interesting approaches to the problem at hand. My passion lies in building software solutions and in the process I ended up learning a lot of technologies and skills. My primary area of interest within software lies in Machine Learning and Data Science.

Why TD?

There are two major reasons why I believe TD is a good fit for my working style and career goals. My educational background is heavily skewed towards technology as is obvious from my resume, however, lately I have developed a keen interest in finance, so much so that I have read nine financial systems and literacy books in the last 12 months.

Secondly, I believe in TD as a growing banking institution. Unlike many major Canadian banks, TD has shown efforts to expand its business both geographically and by the measure of services it provides. I would like to work at a progressive financial institution that gives me an opportunity to apply my skills in software with my passion in finance. A fun fact, about myself. When I started my investing journey, the first stock I ever bought was TD on the TSX. I still hold it and will hold it for the foreseeable future!

Yours Sincerely
Hetav Pandya
